Environmental Risk Assessment

**ERAS Assistant**
Online - ask anything

Hi! I'm the ERAS Assistant 🌱
Ask me about risk levels, AQI, wind,
projects, or what your dashboard
means.

[How does ERAS work?](#)

I pull live weather & air-quality data,
score the risk, and recommend safe
actions — in seconds. 🌱

HOW TO USE ERAS

Your journey from sign-up to smart environmental insights — in 5 simple steps

About ERAS

ERAS is a forward-thinking platform dedicated to innovation, transparency, and impact. We build tools that empower people with real-time data and actionable insights.

USE CASES

Real-World Examples

01 / NEW CITY PROJECTS

New City Developments

NEOM — Tabuk Region

Large-scale urban developments built on untouched land carry significant environmental implications. ERAS helps teams assess soil conditions, proximity to protected zones, and long-term land-use risks before work begins.
